

# MERRY CHRISTMAS

Cut out along the outside solid line  
Score the dotted fold lines

All folds, on dotted lines, are Mountain folds except where indicated.

Glue gray tab 'A' to 'a' side and 'B' to 'b' side. This will make the pyramid tree.

The 'tree trunk' is a hexagon. Make it by glueing tab 'C' to side 'c.'

Tabs 'D' get glue on the underside and help secure the bottom. The tree trunk will end up on the bottom as you glue tab 'D' attached to the tree trunk.

Print, cut, fold and glue as many as you like. Share a photo of your tree(s)
