

Cut out along the outside solid line

Score the dotted fold lines

All folds are Mountain folds except where indicated.

Glue gray tabs 'A' to 'a' side and 'B' to 'b' side. This will make the pyramid tree.

The 'tree trunk' is an hexagon. Make it by glueing tab 'C' to side 'c'.

Tabs 'D' get glue on the underside and help secure the bottom. The tree trunk will end up on the bottom as you glue in place tab 'D'.

Share a photo of your tree(s)
